VOLUME LXIX., NUMBER 49.

REDWOOD CITY, SAN MATEO COUNTY, CALIFORNIA., MARCH 15, 1929.

ESTABLISHED IN 1859.

AVIATION SCHOOL TO BE STARTED

Will Teach All About
Planes and How
To Fly Them

An aviation school will be established here by H. B. Fowler, well-known automobile dealer and aviator, and Joseph Larkin, widely known. New planes will be used by the Fowler-Larkin school and all types of flying will be taught.

Fowler, who has been a resident of this city for several years, is well known in the motor industries, as he conducted a flying school for ten years during the infancy of the flying industry at Seattle, having previously worked on one of the Wright machines in Washington, D. C.

Larkin studied air work in 1910 with Christofferson, Huxley and Fowler. He flew at the local field in 1915-16, and saw service during the war in England, France and Sicily, and was instructor in ground school with the Royal Air Force.

He is a graduate of the University of Washington School of Engineering, and was with Lincoln Beech prior to his death and was with the Hoxby flying service prior to the death of Hoxby in 1914.

Larkin is now engaged in lecturing on aeronautics and on designing and building various types of planes.

It is the plan of the new school to teach all subjects necessary for complete understanding of aviation. Instruction will be given in theory of aeroplanes, construction and lay-out plans, wings, motors, propellers, aerodynamics, etc.

Rear work will be taught and actual flying. The course will follow the specifications laid down by the United States Department of Commerce.

In addition to teaching flying, the firm will build and sell aeroplanes. A hangar is to be constructed on the Redwood flying field for use of the school's planes.

**Funeral Held for
William H. Scanlon**

Funeral services were held Tuesday morning at Mt. Carmel Catholic church for William H. Scanlon, well-known steam engineer of this city, who died suddenly while on a visit with friends in Menlo Park last Saturday evening.

A high mass was celebrated, which was followed by interment in Holy Cross cemetery, Colma.

W. H. Scanlon was a native of Ireland. He had been a resident of this city for the past twelve years, and during that time and until a few weeks ago, been employed as engineer at the plant of the National Magnesia Manufacturing Company. He was an able workman, and was liked and respected by the men under his charge.

He was a member of San Mateo Lodge No. 1112 B. P. O. E., of Court Madrone P. O. E. and of Redwood City Aerie, P. O. E. He is survived by his widow, Mrs. Katherine J. Scanlon, a brother, Joseph Scanlon, and was a brother of the late Frank and Kittie Scanlon.

**MENLO PLANS FOR
ST. PATRICK NIGHT**

The big St. Patrick's Day celebration takes place tomorrow night in the Hall of the Nativity. A big audience is anticipated as the program is to be the very best ever presented to a Menlo Park audience.

To miss this entertainment is to lose an evening of fun and merriment. Be sure and be present.

D. E. O'Keefe, who went to Washington to see Herbert Hoover inaugurated, returned yesterday, having had an enjoyable time at the capital. He is loud in his praises of the manner in which the California delegation was entertained by Senator Samuel M. Shortridge at the capital. O'Keefe is to give a complete account of the trip in the next issue of this paper. District Attorney Swart who accompanied the excursion, returned late yesterday.

**SCHOOL TRUSTEES TO
RUN FOR RE-ELECTION**

The terms of two school trustees of this city will expire on the 29th of this month. Walter Kellogg, president of the board of trustees of the Sequoia Union High School district, and C. M. Duxgood, of the Redwood City Schools, are the two whose terms expire. Both men will stand re-election on that date.

The local councils of Y. M. I. and Y. L. I. will give a St. Patrick's dance tomorrow evening in the Foresters hall. Music for the occasion will be provided by Towne's orchestra.

Merjeth, 8-year-old son of Dr. and Mrs. Herbert Clattenburg, fell from a swing at the Lincoln school this week and suffered a broken arm.

AN OBSERVER SAYS—

—Went to the Big Opening he other day—the long promised, widely heralded, strongly advertised Big Opening in a Big City of one of the Big Stores of America.

—There were big aisles, big piles of merchandise, big crowds and a thousand clerks to wait on 'em—but now we come to the Biggest Point of it all to the people of hereabouts—for actual comparison proved that in most things you can do as well—yes, even better in many things—right here at home in Redwood City.

Mechanic Hurt When Struck By Delivery Auto

Antone Smith of this city was struck and seriously hurt Wednesday when he was run down by a car driven by Gee Bow, Palo Alto Chinese. Smith was walking north on Perry street when struck by the delivery car driven by Bow.

Smith was treated by Dr. H. A. Clattenburg. His injuries are said to consist of a crushed left leg and severe abrasions. Two wheels of the car are said to have passed over him. Smith a mechanic in a local garage.

Bow was placed under arrest on a charge of battery by Officer Clyde Genocchio. His bail was set at \$500 cash or \$500 bond by City Judge Albert Mansfield. He appeared before Mansfield for hearing yesterday afternoon.

TWO FINED FOR DRUNKEN PARTY

A woman who gave her name as Olga Evans and a companion named F. Ryan were arrested in Menlo Park Monday night by Menlo police. The woman was booked for being drunk and disturbing the peace, and her companion for drunkenness and illegal possession of liquor.

Both appeared before City Judge Lawrence Cooke and were fined \$25 each. The fines were paid in both cases after a few hours spent in jail.

SEQUOIA 130'S LOSE 23 TO 21

The Sequoia 130-pound basketball team did not fare so well Friday night, when the pre-championship game with Santa Cruz was lost to the Southerners by a tight score of 23-21.

A strange court, lack of rooters, and a general "off" night were the only reasons to which the loss was attributed, but the fact that the Indians lost this one and only league game out of the whole series, should hardly be enough grounds on which to condemn the middle weight hoopers.

It is particularly unfortunate that the Cherokees should have lost this game, because the following tussle would have been played for the North Coast Section championship, and would have occurred on the Sequoia court, bringing in a nice revenue, in addition to enabling all friends of the high school to witness the game.

TIMES IN NEW YORK

TWO ESCAPE AS TRAIN HITS CAR

Two men, Phil Rodgers and Reuel Brown, narrowly escaped injury or death Sunday morning, when a car in which they were riding was crashed by a train at the Atherton crossing. Both men miraculously escaped although the truck was completely wrecked and was thrown about 200 feet by the force of the collision. Rodgers is a resident of Redwood City; Brown lives in North Fair Oaks.

COASTSIDE FIRE IS INVESTIGATED

Fire of unknown origin early Sunday morning destroyed the Rockaway Inn. The matter has been investigated this week by Sheriff McGrath and Fred Clausen of the State Board of Fire Underwriters. The coastside resort was owned and operated by Hermann Bazinet.

Sheriff J. J. McGrath and Deputy Sheriff C. A. Callaghan are in Sacramento today attending the sheriff's convention. The convention was in session yesterday and will continue today.

Mr. and Mrs. G. B. Merrill returned yesterday from a visit in Los Angeles. While in the southern city Mrs. Merrill was taken ill, but is recovering at her home here.

Miss Rosemary Ryan, whose engagement to Baron Daziel was recently announced, was the guest of honor at a bridge party given by Miss Madeline Shields at her Grand street home Saturday evening.

The Easter services at the Woodside church will be conducted by the children of the Sunday school. This has been the custom here for many years. The children are being rehearsed by Miss May Huddart.

Brentwood — \$25,000 will be expended for construction and equipping gymnasium for Liberty Union High School.

SEQUOIA TEAM WINS DEBATE

Second Contest Won
In Week by 3 to 0
Score

Two Sequoia debaters on Friday repeated the feat which had been accomplished the day before by two other Sequoia boys and brought home a 3 to 0 decision from San Jose. The winning team on Friday consisted of Hubert Barry and Kenneth Barteaux, who defeated Loretta Walters and Arthur Hutchins of San Jose.

The subject of the debate was the same as that in which a team, consisting of Wendell Peterson and Wilbur Hogevoil won a 3 to 0 decision over Palo Alto the day before. "Resolved that the United States should increase her navy to the full strength of the 3-2-5 quota."

Barry and Barteaux won their decision supporting the affirmative side of this question; Peterson and Hogevoil won theirs with the negative side.

Funeral Services Held Tuesday for Mrs. Mae E. Secker

Funeral services were held Tuesday for Mrs. Mae E. Secker, who passed away here late Saturday. Services were at the parlors of the James Crowe Company, and were followed by interment in Cypress Lawn cemetery.

Mrs. Secker was a member of a well-known Redwood City family. She was the daughter of the late Peter and Anna Early. Peter Early was a well-known farmer and grading contractor here some years ago.

The family at that time made their home on Arguello street. A farm was also owned in the Bear Gulch district which was later purchased by the Bear Gulch Water Company.

Mrs. Secker was the wife of Edward J. Secker, the mother of George, Gene and the late Jesse Secker. She was the sister of Thomas and Burnett Early. Mrs. Anna G. Loveland and the late Edward T. Loveland.

EXCHANGE CLUB TOLD OF CANADA

An interesting illustrated lecture on travel through Canada and Alaska was given before members of the Redwood City Exchange Club at the club's regular meeting Tuesday evening.

The speaker was W. A. Truxford, traveling agent of the Canadian National Railways and W. J. Gikerson, general agent of the same company.

The chairman of the meeting was J. P. Hearne, who arranged a St. Patrick's day program. A short talk on the origin of Standard Time was given by Francis Tinney. Fred Steen played two numbers on the trombone and two vocal numbers by A. J. Keney added to the evening's meeting.

INTEREST DISPLAYED IN BELMONT ELECTION

A hotly contested election for three members of the board of trustees of the Belmont Sanitary District was held last Monday evening.

The result that Daryl Callen, Hermann Kohlmoos and George Roussel were elected. A great deal of interest was taken in the election and three quarters of the registered voters cast a ballot on that day.

The votes received by the six candidates were: Daryl Callen, 183; Hermann Kohlmoos, 181; George Roussel, 173; S. J. Cook, 127; W. J. Marra, 120; Clarence Johnson, 113.

AID IN SIGHT FOR WORTHY VETERANS

SACRAMENTO, Mar. 14—(CNP)— Assistance for the veterans of San Mateo county apparently is well on its way today, with the drive for a \$20,000,000 bond issue for home and farm loans, started in the legislature last week by the unanimous approval of the committee on Soldiers and Sailors Affairs of the Assembly.

With no money in the Veterans Fund to meet them, there are thousands of petitions from worthy veterans asking for a state loan in the purchase of a home or farm on file with the Veterans Welfare Board, its secretary George Stout announced.

Miss Rosemary Ryan, whose engagement to Baron Daziel was recently announced, was the guest of honor at a bridge party given by Miss Madeline Shields at her Grand street home Saturday evening.

The Easter services at the Woodside church will be conducted by the children of the Sunday school. This has been the custom here for many years. The children are being rehearsed by Miss May Huddart.

Brentwood — \$25,000 will be expended for construction and equipping gymnasium for Liberty Union High School.

REDWOOD MAN KILLED WHEN HIT BY TRAIN

While returning to his home on Cedar street Wednesday evening from a nearby grocery, A. S. Sahlborg, well-known resident of Redwood City, was struck by a north-bound passenger train at the Cedar street crossing and instantly killed. He was struck by the front of the engine and thrown clear of the track, but suffered injuries which resulted in instant death.

Sahlborg was born 78 years ago near Linköping, Sweden. He came to the United States when quite young. For the past 50 years he had been a resident of this city and prior to that time had lived in San Jose and San Francisco. It was in San Jose that he was married.

Mr. and Mrs. Sahlborg raised nine children, eight of whom are now living, most of them residents of this city. They are Mrs. Hilma Fowler, Mrs. Estelle Clattenburg, Charles, Albert and Oscar Sahlborg of this city; Mrs. Hilma Lamson of Watsonville; Mrs. Ulrica O'Sullivan of Washington; Adolph Sahlborg of San Francisco, and the late Viola Moore of this city. In addition to these children, the deceased is survived by his widow, Mrs. Hannah Sahlborg.

Sahlborg was a member of Embarcadero Camp No. 256 Woodmen of the World and of Metamora Tribe No. 24, Improved Order of Redmen.

The funeral will be held tomorrow afternoon at 2 o'clock at the parlors of the James Crowe Company on Webster street. The details of the funeral and place of interment have not yet been fixed upon.

Slaughter of Game Menace to Species

The present limit laws governing fish and game are to control the destructionist and yet greater conservation would ensue if sportsmen would confine their bags to their needs, rather than continue their efforts for the glory of reaching limits after needs are satisfied.

It has become a habit to boast of getting the limit after every excursion as evidence of prowess and few men stop their pursuit of the "finny, feathery and furry denizens of the wild" on account of this weakness.

I have seen fishermen land a salmon thirty pounds or more and promptly cast their spinnners for another, because the law permits two. Duck hunters are offering resistance to the bills reducing the limit from 25, the present law to 15 and this twice a week and the same applies to all fish and game. Family requirements cannot reach beyond one large salmon nor can it reach thirty ducks per week. Why is this? The answer must be pride as a killer, generosity to friends, or competition among sportsmen. Unless thought is given to such suggestions this great country's fast diminishing wild life assets, will go the way it has in older countries and that is, preserve and breeding grounds exclusively for the rich and nothing for the common man.

Shells Once Used As Money In U. S. A.

Picturing vividly the period before the American Revolution, when money was so scarce that substitutes such as shells, wampum and corn, were used in its stead, the current folder in the series being distributed by the First National Bank draws a striking contrast between the past and the present.

In reading this folder, one is reminded of the recommendation of Thomas Edison—that gold should be abandoned as the standard of value and the world should return to a commodity dollar.

In fact, Professor Irving Fisher of Yale, in his book, "Stabilizing the Dollar," developed the formula for establishing such a dollar.

The methods of our forefathers were less scientific but quite as effective for a time, the bank's folder relates. But in view of the difficulties later encountered, it is doubtful if very much support ever will be developed for the idea repeating their experiments.

Under the title "Early American Money," this latest publication in the series on "Money and Civilization" presents many little-known facts. It describes the first American mint established in Massachusetts in 1782, to which the colonists took whatever metals could be spared—copper pots and kettles, silver candlesticks and buckles, gold ornaments of all kinds—to be melted down and worked over into the coins that could be exchanged for luxuries from abroad for which the young Colonies hungered.

There is much interest in this review of that little-known stage of American commercial development. To study those ancient experiments at makeshift arrangements is to appreciate how far the United States and the world at large have gone along the road of commercial development and how much more general is the understanding of the principles that underlie American currency.

The remaining numbers of this series, the bank announces, will cover the development of money and banking in this country, and it is promised that they will be unusually interesting and informative.

WOODSIDE

The Woodside Girl Scouts were given a trip to the Stanford Museum on Monday afternoon by Mrs. George Givens and Mrs. O. E. Blackington. The girls were greatly interested in the exhibits there and plan another visit when they can devote more time to the wonders displayed there. The girls making the trip were Helen Hallett, Gladys Kelly, Minnie Heiser, Annie Bobick, Frances Hubbell, Viola Kelley, Virginia Davis, Phyllis Blackington, Edith Ferrari, Marie Hubbell, Jennie Rae Christensen. The Scout Troop will give a whist party on Friday afternoon at the Parent-Teacher Association hall, the proceeds to be used for summer camp activities.

The Woodside Fire Department will give an invitation dance at the Woodside Hall on Saturday evening. The decorations and prizes will honor St. Patrick.

John Mason, who several years ago was a rural school supervisor for San Mateo county and is well known to the boys and girls of the neighborhood, was a visitor at Woodside on Sunday last.

Two Boys Admit Dynamite Blast

A mystery which has had Sheriff J. J. McGrath's force guessing for some time was solved this week with the arrest of two boys. Last October a terrific blast blew the tract office of Leonard & Holt at the end of Jefferson avenue into a mass of splinters and scattered it over several acres of ground.

The blast has been a mystery from that time. No motive was found for the act, and no traces were left by which to identify the perpetrators.

Police Officer W. H. Thorpe of Redwood City found two boys, Harold Saunders, son of Mrs. Florence Saunders, and Charles Preston, son of H. D. Preston, shooting dynamite caps on Tuesday of this week. He investigated the caps and recommended that the boys be investigated by the sheriff's office. The boys were arrested and were questioned by Assistant District Attorney Edmund Scott. To him the boys confessed that they had blown up the tract office.

The boys stated that they had stolen a box of dynamite from the Leonard & Holt quarry. They had placed it under the tract office and attached a long fuse and then gone home. They were in bed, they stated when the blast went off. It was done "just for fun" they said.

CLUB SEEKS GAME REFUGE IN COUNTY

The San Mateo County Fish and Game Club will soon be circulating a petition for presentation to the Supervisors of San Francisco, asking that the property of the Spring Valley Water Co., in San Mateo county recently acquired by the City of San Francisco be made a state game refuge.

In recent years, it has become evident that to safeguard our capital of breeding stock, it is confined to sportsmen's bag limits but the establishment of game sanctuaries, where wild life is allowed to breed unmolested and where it may increase spreading out, over neighboring territory, thereby furnishing food and sport for those wishing to seek it. Owing to the great increase in population and the reclaiming of natural breeding grounds and the consequent reduction of food supply as well as the increase number of hunters from nearby localities, makes the establishment of more game refuges urgent.

The state has already recognized the value of such refuges and preserves by establishing a large number covering millions of acres of land including National Parks and National Monuments, all of which receive complete protection.

Public sentiment is spreading rapidly in this direction as is evidenced by the chain of such refuges extending from the Canadian to the Mexican borders. The citizens of Oakland have shown such appreciation of wild fowl life on beautiful Lake Merritt, where thousands of birds visit every winter, that they find it worth while to furnish grain for feed.

Suitable lands for refuges are of too plentiful and San Mateo county will be negligent of its opportunity, if this petition is not so overwhelmingly endorsed by the residents and civic organizations as will guarantee its success and place our county in the list of conservationists and lovers of wild life.

ODD FELLOWS PLAN SOCIAL DANCE MAR. 30

The "Booster" Committee of Bay View Lodge of Odd Fellows will give another one of their popular social dances on Saturday evening, March 30th in Odd Fellows Hall. Odd Fellows and their friends are cordially invited. Good music is assured and dancing will continue to 1 a. m.

RIFLE RANGE PROVES POPULAR DIVERSION

Last week a Clay Pigeon trap was set on the new shooting grounds of the San Mateo County Fish and Game Club and while in trial by only a few members, it attracted several hundred onlookers. Another trap has already been set and the next shoot will no doubt attract even a larger number. Later there will be competitive shooting for prizes by individuals and teams or service clubs from surrounding localities, all under the supervision of the Club. The public also will be invited to participate and the project will undoubtedly meet with a hearty response from a large number who have been waiting for just such an opportunity to demonstrate their skill.

The grounds are located on Third avenue, San Mateo, one block east of the Bayshore boulevard.

THREE ELECTED TO SANITARY BOARD

An election was held Monday by the Menlo Park Sanitary District to fill three vacancies on the board of trustees. Four candidates were in the field for election. The votes received were as follows: Hugh Porter, 369; Ira Lillick, 346; Mrs. Emma Stribling, 295; W. G. Stevens, 243. A total vote of 503 was cast.

SEQUOIA TIMES AWARDED FIRST PLACE IN U. S. A.

More than realizing the hopes of those who aided in its participation in a national journalistic contest held under the auspices of Columbia University Scholastic Press Association in New York City last Thursday, Friday and Saturday, the Sequoia Times, was adjudged as placing first among high school papers published by schools of the size of Sequoia Union High School in the United States. In the contest the Sequoia Times was in competition with 2700 high schools from all sections of the country.

Word of the award was received at the school on Wednesday. The message received, however, did not say how many first place points the Sequoia Times received, and word as to this is being expected daily from the representatives of the school who are now in New York.

The Sequoia Times was represented at the journalistic contest which took place at Columbia University by Miss Eunice Schmidt, faculty advisor, and by Stanley Netherton, Jr., manager. The local paper has placed first among school papers in California for the past three years.

Write-ups of the convention and pictures of the representatives of Sequoia Times now in the east appeared in the Chicago Tribune, Buffalo News and the New York World, giving great credit to the California high school.

LOCAL MERCHANT HAS UNIQUE TABLE CLOTH

The Hearne Dry Goods Company is displaying this week a tablecloth which it would be hard to duplicate. The cloth was made in Ireland and of pure linen, hand made. It is a large cloth and elaborately decorated.

The decorations are woven into the warp and woof of the linen and consist of shamrocks and Irish scenes, ruined castles, Irish dogs, harps and old crosses. Altogether, it is a piece of art and an excellent specimen of the Irish weavers' skill.

CIVIC UNION MEETS IN COASTSIDE TOWN

A meeting of the Coastside Civic Union at the school house at Salada Beach last Monday night was attended by close to one hundred members. Salada was chosen by J. J. Bettencourt, president of the Union as the meeting place in honor of the newly formed Salada Beach Chamber of Commerce.

The Coastside Civic Union is composed of community organizations throughout northern California. The meeting was devoted to a discussion of plans for a more thorough consolidation of community clubs. Clarence J. Stafford, president of the Salada Beach Chamber of Commerce, was the speaker of the evening.

Thomas Hickey, supervisor of San Mateo county, also addressed the meeting and welcomed Salada Beach into the Union.

Following the business meeting a social gathering was held and sandwiches and coffee were served.

THE "SPINNING-WHEEL" ERA

In the early days of the nation the women used to gather at "spinning-bees"; later there were "sewing-circles"; and now we have the afternoon "bridge."

Banking, too, has undergone a transformation, and today your bank offers you a type of service that was totally unknown a hundred years ago.

There is a decided advantage in being identified with a progressive bank. We will welcome your account.

First National Bank San Mateo County Savings Bank Home Owned Banks

TO SPEAK ON HARBOR BONDS

D. R. Stafford Will
Tell Needs of Bay
Development

City Councilman D. R. Stafford will address members of the Redwood City Chamber of Commerce at the luncheon meeting of that organization Monday on the subject of the proposed harbor development here. Bonds for the purchase of a tract of harbor land and for its improvement will be voted on by the people of Redwood City on April 9. The chairman of the meeting will be Carl Wagner, manager of the Bank of Italy and president of the chamber of commerce.

Senior Play Is Marked Success

Friday evening, March 8, the senior class of the high school presented "The Rivals" by Richard Brinsley Sheridan. For over a hundred years audiences have been enjoying this delightful comedy, but we feel sure that at no time has any audience enjoyed a more finished amateur production.

The cast was well chosen and showed the excellent coaching done by Miss Elizabeth Chase, new Sequoia teacher. Attractive, colorful settings, as well as the elaborate costumes which had previously been used in a New York production of the play, added to the success of the performance. Remarkable as well were the quick changes between scenes due to the stage managing of Ben Rodgers.

Fred Steen, as Bob Acres, showed exceptional dramatic ability; his lines were well given and his actions all that could be desired. At no time did Bob Acres lose his character. His scenes with David, played by Fred Blackington; with Sir Lucius, played by Norman Hollingsworth, reduced the audience to roars of laughter. Especially good was the last scene with the suggestive tomb stones as the background for the proposed duel.

Merle Jean Martin, as Lydia Languish, was sweet and gracious, a lovely picture in her old-fashioned costume.

Mrs. Malaprop's misuse of the English language was forcefully shown by Helen Abel. Boyd Fairfield, as the irate father, stormed his way into the approbation of the audience. Other characters who faithfully portrayed their parts were Lillian Phinney, as Lucy; Raymond Hollingsworth, as the coachman and a boy; Mildred Bright, as Julia; Sam Blackman, as the butler, Fag; and Leslie Heald, as Faulkland, the lover.

An appreciative audience helped to make this one of the best productions ever given at Sequoia.

CARD OF THANKS

To the many kind friends who by word and deed expressed their sympathy and in many ways softened the dark hour of our bereavement in the loss of a loving husband and affectionate brother we wish to express our sincere gratitude.

MRS. W. H. SCANLON
JOSEPH SCANLON

Drink Water If Back or Kidneys Hurt

Begin Taking Salts If You Feel Backache or Have Bladder Weakness

Too much rich food forms acids which excite and overwork the kidneys in their efforts to filter it from the system. Flush the kidneys occasionally to relieve them like you relieve the bowels, removing acids, waste and poisons, else you may feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, the stomach sour, tongue in coated, and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, the channels often get irritated, obliging one to get up two or three times during the night.

To help neutralize these irritating acids and flush off the body's urinous waste, begin drinking water. Also get about four ounces of Jad Salts from any pharmacy, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine and bladder disorders disappear.

This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to help clean and stimulate sluggish kidneys and stop bladder irritation. Jad Salts is inexpensive and makes a delightful effervescent lithia-water drink which millions of men and women take now and then to help prevent serious kidney and bladder disorders. By all means, drink lots of good water every day.

Isa Knows No Winters

The late of Pines has one continuous summer, the variations of temperature throughout the entire year being scarcely as great as often occur in a single summer month in many of the Northern states. It is rare, indeed, when the thermometer, in summer on the island registers as high as 90 degrees, and in winter the mercury never falls below 50 degrees.

Considering It

The High Forehead—We're going to have a musical program at the club next Saturday. It's to be a Meyerbeer evening. You'll be there?

The Low Brow—That depends. Is Meyerbeer the real stuff or just one of those kickless, near beer propositions?

They're Peaches

Constantine (to clerk in store)—I want a peck of apples.

Clerk—Do you want Baldwin's?

Constantine—Sure. Did you think I wanted some with hair on?

CALIFORNIA PILE REMEDY

A Guaranteed relief without pain. If not satisfied, money refunded. If not at your druggist accept no substitute but send \$1 to Quinsin, the Druggist, Oroville, California. Ask about our Rheumatic Relief. Adv.

The Proper Thing
"What shall I wear for my screen test?"
"Something flimsy, of course."

A man is never so sure that he is perfectly sober as when he is tolerably drunk.

Are You Ready

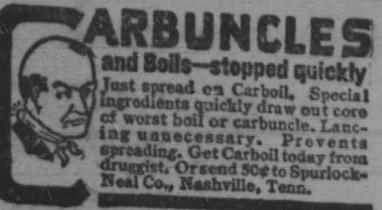

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueler pangs of colic, constipation or diarrhea; effective, too for older children. Twenty-five million bottles were bought last year.

Fletcher's CASTORIA

CALIFORNIA NEWS BRIEFS

Construction of the University of California's International House, to be built by John D. Rockefeller, Jr., at a cost of \$1,750,000, will probably begin in May, according to announcement from Allen C. Blaisdell, director of the project.

Dr. Henry Meade Bland, faculty member of the State Teachers' College at San Jose, received the recognition his many friends have organized to bring him, and was named Post Laureate of California by the State Senate to succeed the late Ina Coolbrith.

Sheriff Charles J. Taylor of San Luis Obispo county, was killed near Santa Margarita recently when the automobile in which he was riding overturned on the State highway. His skull was fractured and he died before he could be taken to a hospital.

While seventy-five men were fighting a losing battle with a tule fire at Pittsburg a fortunate change in wind stopped the blaze and probably saved huge gasoline supplies. Men from the town were hurriedly recruited to fight the flames when the fire, fanned by a strong breeze, swept out of the dry marsh and on toward three Standard Oil gasoline tanks each containing 30,000 gallons of gasoline and an oil tank of 700-barrel capacity. The fire was making no effect on the tanks as it crept within a few yards of the tanks. At the critical moment the wind shifted its direction and drove the fire until it exhausted itself at the river's edge.

The possibility that John Hawkins, former captain of the University of Southern California football team, now serving from five to seventy-five years in San Quentin prison for burglaries, may obtain the cerebral operation which he hopes will remove his criminal tendencies, was intimated by Joseph Ryan, Los Angeles attorney. Ryan was a deputy district attorney of Los Angeles county during the regime of ex-District Attorney Keyes.

Californians, rejoicing March 4 in the inauguration of one of their citizens as thirty-first President of the United States, also discovered a significant coincidence: California was the thirty-first in the list of States admitted to the Union. Actually Herbert C. Hoover is the thirtieth man to hold the office of President but, in computing the list, the practice has been to count Grover Cleveland twice. He served two terms, but not continuously, being elected in 1884 and 1892 but defeated in 1896.

The state prison board of directors, meeting at San Quentin paroled 7 convicts, ordered 3 men deported, postponed action on 1 case, and ordered 44 cases set for future action. Those paroled were: Joe Perry, Alameda county, bigamist; N. L. Dorsey, Inyo county, bootlegger; Darrell Murray, Yolo county, forger; Larry Deane, Santa Barbara county, burglar; Oliver Boyd, Yuba county, forger; Chas. Kerber, San Diego county, forger, and Chas. Rao, Alameda county, forger.

Nearly one-half of the annual budget for 1935 of the Pacific Gas and Electric Company, amounting to \$29,966,844 will be spent in the San Joaquin Valley, chiefly for the construction of the new natural gas pipeline, it was announced by the company. The pipe line from Buttonwillow, in Kern county and Kettleman Hills, in Kings county, will cost about \$13,000,000, it was announced. This line will carry gas to valley cities, Oakland and San Francisco and huge holders will be constructed. It was announced that the construction program calls for the building of 283 miles of 20-inch transmission main through which it will be possible to deliver gas at the rate of 125,000,000 cubic feet per day. The budget also provides for expenditures to take care of reinforcement and extension of the company's system and to take care of anticipated expansion, according to a statement by President Hoeckenbecker of the concern.

Final apportionment of California's school funds for the fiscal year ending June 30, 1935 distributing a total of \$24,969,780.19, has been announced by Verling S. Kersoy, State Superintendent of Public Instruction. The funds allocated apply only to elementary and high schools, junior college apportionments for the year having been completed by October of last year. Elementary school funds were apportioned on basis of total average daily attendance, commensurate teacher units and excess cost of educating physically handicapped children. The total elementary school apportionment amounted to \$18,931,562.23. The share of the high schools, augmented by allotments for special evening and part-time classes totaled \$5,988,217.96. Los Angeles county, with a total of \$8,576,440.23, received more than four times the \$2,020,518.77 allotted to Alameda, next largest beneficiary. San Francisco county was third, with \$1,754,321.52.

J. B. Platt of Santa Rosa, was appointed engineer for the North Shore Highway District comprising San Francisco, Marin, Sonoma, Mendocino and Humboldt counties. Platt was formerly connected with the Sonoma county engineer's office and also served as engineer on highway projects in Del Norte and Lake Counties.

Application by the Northwestern Pacific Railroad for permission to abandon the Point Reyes-Monte Rio narrow gauge line in Marin and Sonoma counties, was made recently before Examiner W. J. Hanford.

Thomas R. Smith of Santa Rosa, reported "killed in action" during the World War, is very much alive and has appealed to the American Legion in an effort to have himself declared so. For 10 years the government has been insisting that Smith's sister, Mrs. Nellie Johnson of Santa Rosa, accept \$10,000 in war risk insurance for her brother's "death." Mrs. Johnson and her brother steadfastly refuse to admit he is "dead" and now Smith has asked the American Legion to aid in straightening out the records at Washington.

Where Rival to Monte Carlo Will Be Established

The National Mid-Winter Flower Show held recently in Encinitas scored another noted success, attracting more than 30,000 visitors from the opening day on Thursday until Sunday evening.

Known to be among the lowest in the entire State, fire loss in San Leandro for the year just ended amounted to only \$15,000, or less than \$1 per capita, according to a report prepared and issued jointly by Fire Chief Joseph Peralta and Edgar M. Hayes, secretary-manager of the San Leandro Chamber of Commerce. The city has been congratulated for the result by the United States Chamber of Commerce.

Eddie Allen, Boeing Air Mail pilot, who joined the ranks of heroes recently when he saved forty motorists from death by starvation by a daring flight in the face of a severe blizzard, is back at the Oakland airport. It was learned, Allen came to the rescue of a group of snowed-in motorists in the Ruby Mountains of Utah, last week when he dropped food to them and later led a rescue squad to their prison.

Charles C. Crites a farmer near Sacramento, was driving along a stretch of gravel road when one of his tires blew out. Removing the tire, Crites discovered the cause of the puncture to be a sizeable gold nugget.

Judge Lindsey Webb made court spectators sit up and take notice at Watsonville when he appeared behind the bench wearing brightly colored beaded moccasins. "Why?" the jurist asked. "They are comfortable and, after all, that's the only thing to take into consideration."

By a vote of 20 yeas, 6 noes, the Senate passed Senator Ralph E. Swing's bill which cuts the duck shooting limit in California to 15 a day or 30 a week. The present limit is 25 a day and 50 a week. Senator Victor J. Canepa of San Francisco sought to amend the bill by providing for 25 daily or 25 a week. That was beaten by 27 yeas to 10 yeas. The amendment was attacked by Senator Swing, Senator Sanborn Young, Senator E. S. Hurley of Oakland and Senator C. C. Baker of Salinas as not a conservation measure. "There is not the slightest question among eminent authorities, that unless the ducks are protected, in ten years we shall see the last of them," declared Senator Young.

A warning to World War veterans to safeguard themselves against possible fraud in connection with land purchases along the Colorado River, in the vicinity of the proposed Boulder Dam, was issued recently by F. N. Belgrano, Jr., State commander of the American Legion. Belgrano pointed out that war veterans are to be given preference in the matter of acquiring public land which will be reclaimed or irrigated by the project, and that pending such time as the project is completed investments are a risk.

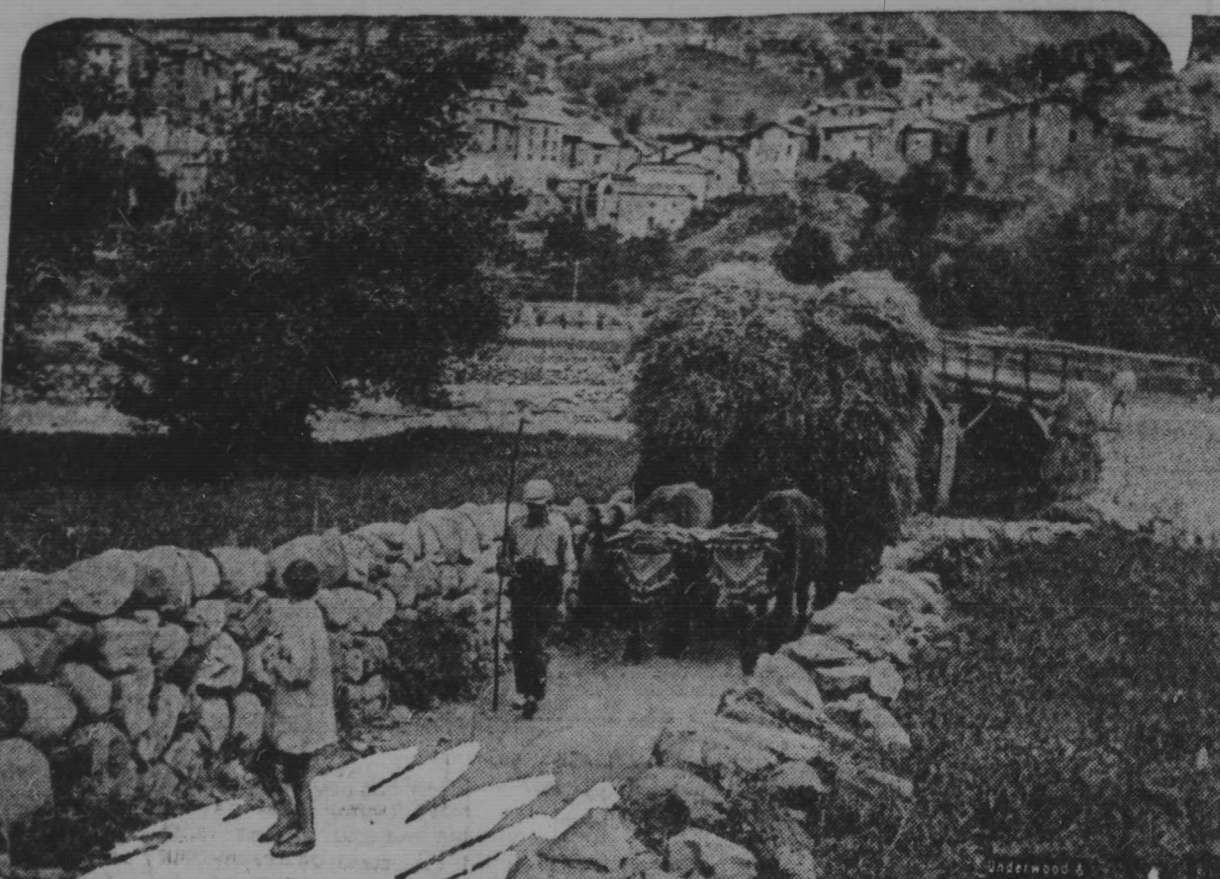

The world's longest highway bridge was thrown open to traffic March 2d with elaborate ceremonies in which President Coolidge participated through the medium of electricity. His touching of a button in Washington was the signal for the descent of the previously lifted central span of the structure from San Mateo to Mt. Eden on the East Bay shore, thereby completing the roadbed for the first vehicles. It was the second time during the Coolidge administration that the Chief Executive has had a personal share in the opening of new traffic arteries over San Francisco Bay waters, the first having been the dedication of the Carquinez Straits bridge two years ago. The new structure cost \$7,500,000; is 7.1 miles in length over water and, with its approaches, aggregates 12 miles. Even the minimum distance surpasses all other similar structures in existence. The bridge was built by the San Francisco Bay Toll Bridge Company, of which Arthur Batty is president.

Utility and Service, Inc., which is seeking to develop the Contra Valley water project in Napa county, has obtained options to purchase thousands of acres of land in the Kellogg Creek district in Eastern Contra Costa county as a site for a water storage basin that would require the building of an imposing dam 100 feet in height. It was learned recently. Individuals associated with the corporation have negotiated an agreement with the East Contra Costa Irrigation district to furnish 10,000 acre-feet of water annually. In addition to this supply there would be drainage from hills. The dam would be built at a cost ranging around \$3,000,000. The water to be stored will serve Contra Costa industries and municipalities. California Water Service Corporation and Utility and Service, Inc., have been waging a bitter fight for supremacy in the water field. The former is negotiating a contract with the city of Vallejo to secure 1,500,000 gallons daily from the municipality to serve Contra Costa consumers until it can develop its \$5,500,000 Black Jack Slough project. Utility and Service is continuing its efforts to develop the Contra Valley project in addition to the dam projected in Eastern Contra Costa.

William Fraga of Pleasanton has returned from Arizona with several loads of wild horses for this year's rodeo, it was announced by Henry Rowell of Castro Valley, who is to have charge of the annual rodeo given by the Hayward Business Men's Association. The rodeo is to be held in June in Dublin Canyon.

Collections in the San Francisco customs district in the month of February, amounting to \$894,083.77, exceeded the total for that month 1934 by \$48,766.89. Collector William B. Hamilton announced.

California citizens saved more money and spent more money during 1934 than in any previous year. Unquestionably the last twelve months' period has been one of prosperity. Judging from conditions at the close of the old year we entered 1935 under favorable circumstances with every reason for optimism. Nearly \$100,000,000 was added to the savings of 300,000 California families during 1934, in the 225 building and loan associations operating in the State. The per capita investment in these institutions increased about \$20 to \$62.

A new gaming paradise, rivaling Monte Carlo, is to be established in the smallest and oldest republic in the world this coming summer. It will be in Andorra, located in the mountains on the boundary line between France and Spain. A French syndicate will build the gambling casino, hotels, golf course, tennis courts and cafes. Above is a scene in Andorra.

Race From Arctic Snows to Tropic Waters

Starting on toboggans from the mountain slopes of Los Angeles County park and terminating with a dip into the semitropic pool at Arrowhead Hot Springs, youthful Los Angeles couples staged a unique race. An hour and four minutes after they had left the snowy mountains, the winners were stripping off furry garments underneath which they were bathing suits, and were plunging into the warm pool in the valley below. The photograph shows some of the starters, and Miss Joyzelle Joyner of the winning team in the pool.

Vice President in His New Home

An intimate photograph of Vice President Charles Curtis, made in his new apartment at the Mayflower hotel in Washington.

"The Flight That Failed"

"Little Alpine," whose hobby, unfortunately, is flying, is climbing into a plane at Miami for the "flight that failed" for the simple reason that the beam at somewhere above 700 pounds.

THINGS WORTH RECORDING

Time is a wonder-worker that labors twenty-four hours daily. The big, sweet Japanese persimmon is sometimes called the "apple of the Orient."

Land in Denmark is sinking in some places at the rate of about an inch every 25 years.

Boy Scout troops are being organized in many hospitals and schools among crippled boys.

Hearing both sides of the question won't alter a healthy prejudice. The cow-nosed ray, a strange sea fish, can dig claws from the sea floor with its snout.

Used tire casings are being made into rubber shoe soles for inexpensive shoes in France.

Investigating evils is like counting up the victims of automobile accidents. Nothing much happens.

Not a New Discovery

The very word "sermon" has become a synonym for dullness; the word "preach" a definition of tediousness. These are not the meanings which these noble words once had—Woman's Companion.

Why They Quit

Such a thing can be imagined as the burden of living up to the unsought confidence people repose in you. At times one doesn't want to be leaned on. This is why overworked people resign.

OLD FOLKS SAY DR. CALDWELL WAS RIGHT

The basis of treating sickness has not changed since Dr. Caldwell left Medical College in 1875, nor since he placed on the market the laxative prescription he had used in his practice.

He treated constipation, biliousness, headache, mental depression, indigestion, sour stomach and other indispositions entirely by means of simple vegetable laxatives, herbs and roots. These are still the basis of Dr. Caldwell's Syrup Pepsin, a combination of senna and other mild herbs, with pepsin.

The simpler the remedy for constipation, the safer for the child and for you. And as you can get results in a mild and safe way by using Dr. Caldwell's Syrup Pepsin, why take chances with strong drugs?

A bottle will last several months, and all can use it. It is pleasant to the taste, gentle in action, and free from narcotics. Elderly people find it ideal. All drug stores have the generous bottles, or write "Syrup Pepsin," Dept. 315, Monticello, Illinois, for free trial bottle.

For Cuts, Burns Bruises, Sores

Try HANFORD'S BALSAM OF MYRRH

All dealers are authorized to refund your money for the first bottle if not suited.

ALWAYS KEEPS IT ON HAND

Lydia E. Pinkham's Vegetable Compound Helps Her So Much

Pittsburgh, Pa.—"I was just completely run-down. I had tired, heavy, sluggish feelings and I could not eat. I was losing in weight. I read so much about Lydia E. Pinkham's Vegetable Compound and what a good medicine it is, that I started taking it. I have taken eight bottles of Lydia E. Pinkham's Vegetable Compound and about the same in tablet form. This is one medicine a woman should have in the house all the time. I am improving every day and I sure am able to eat. I am willing to answer any letters I get asking about the Vegetable Compound."—Mrs. Edna Kuzma, 21 Chautauque St. N. S., Pittsburgh, Pa.

Breezy and Attractive
"Is the theater cool?"
"Well, the play creates gales of laughter."—Stray Stories.

The woman who hesitates at an auction sale sometimes wins by losing.

The giant comes high, but museums have to have him.

Acidity

The common cause of digestive difficulties is excess acid. Soda cannot alter this condition, and it burns the stomach. Something that will neutralize the acidity is the sensible thing to take. That is why physicians tell the public to use Phillips Milk of Magnesia.

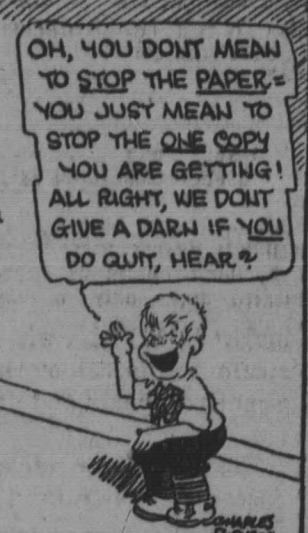

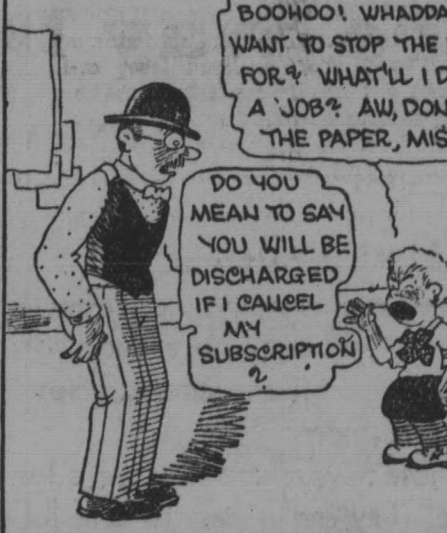

One spoonful of this delightful preparation can neutralize many times its volume in acid. It acts instantly; relief is quick, and very apparent. All gas is dispelled; all sourness is soon gone; the whole system is sweetened. Do try this perfect anti-acid, and remember it is just as good for children, too, and pleasant for them to take. Any drug store has the genuine, prescription product.

The Harbor Bonds

NEXT month the people of Redwood City will be called upon to vote either for or against a bond issue for the purpose of acquiring a tract of waterfront land for the city to be used as a municipal wharf and for making such improvements on the land as shall fit it for this use.

This proposition is one of great importance for Redwood City, and one that should receive the careful study of every voter. Redwood City is peculiarly and advantageously situated on San Francisco bay. The channel at this particular point makes a sharp turn toward the San Mateo county shore and at this particular place approaches more closely to the bank than at any other point along the bay shore. This makes it possible for deep water ships to come quite close to the bank without danger of lodging on the mud banks.

Such ships in fact already are making regular calls at the wharf of the Pacific Portland Cement Co., which adjoins the proposed site of the municipal wharf. With proper facilities provided here it would be possible to offer prospective manufacturers quick and economical transportation of raw materials and finished merchandise. Shipments could be made to all parts of the world without rehandling, a valuable asset in inducing industries to locate here.

Redwood City must look for its future in the development of industries along the bay front, and any expenditure made now by the people of this district, will be more than repaid in the not very distant future by the up-building of industry and commerce here. Redwood City will go ahead whether or not the harbor bonds are passed. But that growth will be made more immediate and secure by the purchase of the proposed bay frontage and the construction of conveniences for the use of shippers. Redwood City will be passing by another opportunity for improvement if the harbor bonds are not carried on April 9.

Battling the Billboard

CALIFORNIA is the latest state to declare war against the encroachment of the billboard along the highways of the state, and obstructing the view of the motorists. A recent announcement of Bert B. Meeks, director of the department of public works, makes it plain that he intends to see that unsightly bill-boards that both obstruct the view and make dangerous curves more dangerous will be removed.

In effect Meek has declared that if the present state laws do not give sufficient power to control and remove the bill-boards from private property along the highways, he will seek such legislation. In other words the fight is on and will be fought to a finish, if Meek carries out his determination.

The fight is likely to be a long one, but as it is being waged and won in several other states, there is nothing to prevent it from being won in this state. It goes without saying that all the tourists who come to California will hail the disappearance of the billboard with rejoicing.

For years the bill-board has been hiding some of the finest scenery in the state. It has also made more dangerous some already dangerous turns on several highways. It is therefore time that the billboard is finally suppressed and that means be provided by state legislation to make its disappearance permanent.

In the last few years public sentiment throughout the country has grown more and more in favor of the removal of all bill-boards from along the highways of the country. At last this sentiment, thanks to the increasing number of automobile tourists, has become crystallized and can no longer be disregarded by government officials.

Electricity's Contribution to Rural Development

"THE real contribution which electricity has made to rural development lies in the fact that it has raised the standard of living in outlying sections by removing much of the drudgery connected with the everyday duties of the farmer and in bringing to him and his family most of the conveniences commonly associated with life in urban communities," said Donald Affleck, an agricultural engineer, recently.

"Within a period of approximately 45 years the electrification of urban communities has not only become practically universal but rural electrification on a national scale stands today as an accepted fact.

"Electricity, as a source of light, illuminates the farm house, barns, garage, poultry houses and other buildings. It lights the rural church, community center and school, making possible community meetings with plays and such attractions as moving pictures, basketball games, etc.

"Electricity, as a source of heat, warms the incubator and the water for the poultry during winter months, operates the electric range or cooker, heats the electric iron, the toaster, percolator and the warming pad.

"Electricity, as a source of power, renders the greatest service on the farm in shelling and grinding corn, threshing barley, separating milk, cutting ensilage and fodder, stuffing sausages, churning butter, milking cows, grooming horses, etc. No less than 100 farm uses were recently shown in a publication of the Committee on Relation of Electricity to Agriculture."

Labor Menaced by Immigration

IMMIGRATION must be restricted still further, if the United States is to keep its unemployment problem within bounds, Thomas N. Carver, professor of economics in Harvard University, believes. He urges that the next step should be restriction of entry from other nations on the American continent.

"If there ever was a time when we needed immigrants, that time is past," he says in an article in the Harvard Crimson. "There never was a time when mechanical improvements for saving labor were increasing more rapidly than now. This is giving us a larger product per worker and making possible higher wages for those who can find employment than are paid in any other country. At the same time it decreases the proportion of those who are needed to do routine manual work."

"A continuing series of labor-saving improvements throws a continuing series of workers temporarily out of employment. One of the acute social problems of today is to find some way to reduce this mass of unemployment. If we do not, it will break the wage-scale. The very least we can do is to restrict immigration. We have already done something in that direction with results which are wholly beneficial."

"The next step," Professor Carver declared, "in our immigration policy ought to be to put the American continent on the quota basis."

The Electrical Kingdom

THE application of electricity to the necessary tasks of mankind has caused an industrial revolution similar to that of the latter 18th and early 19th centuries when steam was first harnessed and applied to locomotives, boats and manufacturing machinery.

Electricity, by replacing steam in many operations, has caused an era of tremendous further progress along the same lines. Steam power expedited production and increased the productivity of workers; electric power gives each worker the equivalent strength of dozens of strong men.

The results are lowered unit costs and prices, increased wages, expanded prosperity and, most important of all, higher standards of living.

A few generations ago a laborer was exactly what the word suggests; his assets were the strength of his muscles and the width of his back. In many parts of the world, where industry has not yet triumphed, this is still true. But in the United States and to a lesser extent in the more progressive foreign countries, the industrial worker, instead of swinging a pick turns a switch and guides a machine that is a miracle of efficiency.

Twenty years ago our average working week was 60 hours. Today, it is 44 hours. The average family income was then \$800 a year, today it is \$2200. Then 10 million people had bank accounts averaging \$700 each; today 23 million people have bank savings of \$1,000 each. And it is estimated that now at least 10 million people own securities in our business enterprises.

Of such is the kingdom of electricity. And we may believe that what has been done in the past is little more than a beginning to vast achievements of the future.

The First Bit of Green

The Bank and How to Use It

Savings and Commercial Department

The banking establishment comes into the life of the average man, first of all through his desire to save. Therefore, the process of opening a savings or commercial account is usually his first contact with the bank.

All too often it is his only contact. Ordinarily the idea of protecting his savings for the benefit of his loved ones or his business, should be tantamount to the idea of building up a savings account. The savings should be backed up by the powerful and all-inclusive service of the Trust Department if they are to be 100 per cent effective. They are absolutely safe and secure in any event, but trust service keeps them functioning normally in the depositor's behalf throughout the emergencies of accident and death and other contingencies that might affect them were it not for such service.

The savings account transaction is perhaps the simplest of the banking contacts. Upon opening such an account, the customer is first asked if he wishes to deposit currency or checks. If checks, it is necessary to furnish proper identification.

He then signs a signature card on which he also notes his address, occupation, name of father and mother, whether he is married or single, birthplace and date of birth and the name of his nearest surviving heir. These questions are for identification purposes only. In other words, they enable the bank to honor his withdrawals in the event that he meets with an accident and is unable to sign his name. Through this information he is also protected in the event that he loses his passbook and it should fall into other hands.

In a joint savings account, where both parties are empowered to draw each must sign a "joint tenant" signature card, attesting an equal right to the account. The same information is required from each as would be required from a single depositor.

In applying for a commercial account the depositor is asked to sign a signature card on which he also notes the nature of his business and the name of the firm or individual by whom he may be employed. Usually a reference from another bank is required unless the prospective client has been introduced by a present depositor or employee of the bank. This means of identification enables the bank to become better acquainted with the depositor in the event that he might wish to establish credit.

In opening an account for a firm by an individual or co-partnership, the depositor must give the information that is required for a personal account and must also satisfy the bank as to the actual ownership of the firm. Every partner in a co-partnership must sign the signature card, as must every sole owner of a firm. The depositor must be either the sole owner or one of the partners.

A corporation desiring to open either a commercial or savings account must furnish the bank a certified copy of resolutions designating the bank as its depository. These resolutions also must embody all instructions as to the depositing and withdrawal of funds in the account and must give the names of those authorized to draw on such funds.

When a depositor wishes to give a power of attorney to someone to draw funds against his account, it is necessary that he sign a power of attorney card furnished by the bank. The person holding the power of attorney must sign the card also. This is attached to the depositor's card and placed in the files. The power of attorney is effective until revoked in writing by the depositor or made inoperative by the death of the depositor.

There are many developments of the savings function, most of which are described in this present series. All of these developments are designed to save money for the depositor. A bank has nothing to sell but service. Every phase, feature and type of service that it sells must yield a definite return to the depositor or other customer either in money or in opportunities whereby money may be saved.

IRRIGATION DISTRICTS VALIDATED BY MEASURE

SACRAMENTO, Mar. 14—(CNB)—All irrigation districts in San Mateo county will be validated by the final enactment of the Witter Validation bills up for consideration in the Assembly this week, it was announced today by Walter D. Wagner, secretary of the California Irrigation Districts Association.

This validation bill, it was explained, rectified any irregularity in the formation of a district, and rendered the bonds of the district so confirmed salable.

SENATORS TO BE OFFICERS OF COURT AT IMPEACHMENT

SENATE TO MEET AS COURT TO TRY JUDGE FOR FIRST TIME IN SIXTY YEARS

By ESTO BROUGHTON

SACRAMENTO, Mar. 14—(CNB)—Senator George C. Cleveland, representing Redwood City and the 11th District in the Legislature, becomes the Honorable Judge Cleveland next Monday morning at 11 o'clock by action of the State Assembly in bringing impeachment charges against Judge Carlos S. Hardy, Los Angeles Superior Judge, and thereby creating a High Court of Impeachment out of the State Senate before whom the Assembly will try the case of "The People of California versus Hardy."

For after taking the oath to "truly and impartially hear, try and determine" the charge against Judge Hardy of practicing law in accepting the \$25000 so-called "love check" from the evangelist, Aimee Semple McPherson, "so help you God," Senator Cleveland will be cast in the new role of jurist in the highest court of the state. A court from which there is no appeal, whose judgments are as final and inexorable as those of the last "Judgment Day," according to constitutional authorities.

Other actors cast in new roles on the Senate stage are: Lieutenant Governor H. L. Varnahan, presiding as Chief Justice. Sergeant-at-arms Joseph F. Nolan, keeping order as Chief Bailiff. Secretary of the Senate, Joseph A. Beck, administering oaths as Clerk of the High Court. While in the guise of District Attorneys conducting the prosecution will appear five assemblymen: Walter J. Little, Harry F. Sewell, William Hornblower and Melvyn J. Cronin.

And constituents of Senator Cleveland and other senators take warning that ye tamper not with justice!

For in his dual personality as judge, the legislator Cleveland may not be appealed to in any way except through sworn evidence produced in court. Arguments, petitions, and letters as to the demands of his constituents in the matter are taboo, and may draw insistent advocates into contempt of court, if not more serious charges. Many matters quite properly brought to the attention of legislators will be considered off-color when presented to a judicial officer.

Court etiquette prevailing in impeachment proceedings is somewhat rusty in California from the fact that use of this semi-summary court has gone out of style with the re-call supplying a speedier method

of ousting delinquent officials in modern times. Sixty-six long years have passed in this state since the Senate heard the court crier's voice crying, "Hear Ye, Hear Ye, the State High Court of Impeachment is now in session!"

Strangely enough that court convening during the bitter factionalism of the Civil War was called to try a Judge Hardy. Judge James A. Hardy of the Sixteenth Circuit District, tried and convicted of sedition, was impeached and removed from office. "Long live Jeff Davis and the Southern Confederacy," tried in a last California duel, the Brotherhood sympathizer killed his northern opponent in the San Francisco hills.

The new Hardy case involving a kidnapping of the woman evangelist, Aimee Semple McPherson, promises to incite quite as general popular interest throughout the state. Guests are at quite a premium, thousands wishing to hear the trial will inevitably be shut out and senators warning their constituents that when the 200 seats in the gallery are filled no more can be admitted. Senatorial courtesy of entertaining "hometown" guests in a club while the senators are acting as judges, under the rules already adopted by the Senate.

In an efficient icebox is the most satisfactory and economical refrigeration you can have—

The Handsome and Efficient New Iceboxes are 'way Down in Price!

The ice companies have cooperated with great factories in the design of scientific iceboxes. And quantity-purchasing has done the rest.

The result is that you can now get a beautiful, gleaming white icebox of the most remarkable efficiency at almost half old time prices.

These new refrigerators are a joy to have. They are so easy to care for, so trouble free. And they keep foods perfectly. Salads remain green and fresh, vegetables and meats retain the natural juices and desserts emerge

just cold enough to be thoroughly enjoyable. And the marvels an icebox help you to accomplish with left-overs!

With an icebox you can always have an ample supply of crystal clear ice for your drinks.

Your ice man will be glad to help you to select the ice refrigerator best suited for your needs. He will see that it is installed properly to give you perfect satisfaction.

Your ice company sells the new ice refrigerators—at the lowest cash prices—and on most convenient terms.

and Keep it Well Filled

She Missed Something

A housewife who had used an ice refrigerator for years bought a mechanical refrigerator. When she found she was missing something—that mere cold isn't enough. Her foods dried up, for only an icebox gives a constant circulation of clean washed air, and keeps foods fresh and at their flavoriest best. So she went back to ice. The mechanical unit of your iceless refrigerator can be removed so that you, too, may have ice.

SAN MATEO ELKS TO GIVE CORN BEEF PARTY

The Elks' annual Dinty Moore party will take place Saturday evening, March 16th, 1929. The affair is in the hands of a committee composed of six of the heartiest purveyors of food to be found in the lodge's jurisdiction. The chairman of the committee is Harry Robb and he is assisted by Wm. H. Toepke, Sheriff J. J. McGrath, Dr. J. C. McGovern, Judge J. V. Gaffey and Harry Collier. These names typify the best in eats and entertainment.

pected to attend and there will be good eats, lots of fun and surprise features galore. The time is 6:30 p. m. Saturday, March 16th.

\$500 FINE LEVIED FOR POSSESSION OF LIQUOR

Frank Modesto, 44, of San Francisco, was booked at the county jail Wednesday, when he was found to be carrying 40 gallons of liquor in his automobile. Modesto was arrested near Visitation Valley by Deputy Sheriff Lawrence Neri.

100 LAWS FOR REGULATION OF NEWSPAPERS PROPOSED

VARIOUS MEASURES AFFECTING THE PUBLISHING OF NEWS AND LEGAL NOTICES

By CLEM WHITAKER
SACRAMENTO, March 14—(CNP)—Approximately 100 measures pending before the 1929 Legislature affect California newspapers, either directly or indirectly—many with vital bearing on the people and communities which the newspapers serve, according to a comprehensive digest of legislation completed today by John B. Long, executive secretary of the California Newspaper Publishers Association.

There is a decided trend in some of the legislation, the association's secretary warned, to bury public information and keep the people in ignorance of matters on which they should be informed.

"Scores of these bills are plainly intended to cut down the number of publications of legal notices, or abolish such notices entirely," said Long. "Such measures, we believe, strike at the fundamental principle of democratic government—the principle that public business shall be kept public, not secret. They deserve the close attention not only of publishers, but of the general public."

The most recent bill to stir up public opposition, declared Long, is a measure by Senator J. W. McKinley of Los Angeles, providing that any city desiring a new ordinance to regulate street traffic, may adopt such ordinance by reference and without publication of notice. The only proviso for public information is that the city clerk shall keep three copies of a book containing the regulations, which shall be open to inspection by citizens.

"Motorists, if this act becomes effective, would be required to pay thousands of dollars in fines to become acquainted with the provisions of their new traffic ordinances," declared Long, whereas a nominal sum expended in the publication of notices would serve the same purpose. Abandon publication of notice and the whole thing is left an education by fines.

The publishers association announced endorsement of a new libel law by Senator Frank Merriam of Long Beach. This measure, Long said, provides that in case of libel action against a newspaper, when a demanded retraction is published within a specified time, the plaintiff can secure only actual damages.

A bill sponsored by the association to acquaint taxpayers with the amount and nature of school expenditures, introduced by Senator Edwin A. Mueller of El Cajon, has attracted strong support, according to Secretary Long. The act stipulates that a summarized budget of all school expenditures and receipts shall be published once a year in a newspaper of general circulation within the school district.

The publishers' organization announced its disapproval today of scores of non-publication of notice bills, together with the following measures that are considered inimical to the publishing business:

S. B. 374, by Senator George C. Cleveland of Watsonville, designed to give candidates for office the right to demand free publicity in their home-town papers. The bill provides that an editor must publish

Bill Would Allow School Districts to Raise Tax Limits

SACRAMENTO, Mar. 14—(CNP)—Trusting the voters of the school districts in San Mateo county to put the financial brakes on when necessary, the State Legislature appears today disposed to adopt the suggestion of Assemblyman T. M. Wright of San Jose allowing the voters of each district to set their own tax limits.

The Wright bill, which will be up for final consideration in the lower house this week, provides briefly that the voters in all school districts be permitted to raise the school tax limit, but when once raised, it must remain the same until changed by the direct vote of the people again.

The school tax limit, now uniform throughout the state, of 70 c for building purposes and 80 c for maintenance, has hampered some school districts in furnishing adequate school facilities, Wright claimed.

A general objection that the proportions for the two purposes are not fair prevails among the legislators, most of them holding that the building limit is too high compared with the maintenance limit.

A baby daughter was born Saturday at the Mills Memorial hospital in San Mateo to Mrs. Walter H. Hilton of this city. This is the third child in the Hilton household, the other two being boys.

FLYING LEGISLATOR WOULD CHANGE LAW OF AIR LIABILITY

SACRAMENTO, Mar. 14—(CNP)—Aviators of Redwood City may take their girl friends for a joy ride along the celestial airways without being liable to damages if they go in for a tailspin, under an amendment proposed today by Dan Emmett of Santa Paula, the only flying legislator in the 1929 session.

Proposed as a trailer on the Jepperson bill, giving equal freedom from damages to the "boy friend" who takes his "sweetie" out in his flier, it plans to popularize hospitality in air rides.

Under court decisions the "host" on an ill-fated auto-trip is responsible for all his guests, and an airman's friends who "fau down and go boom" are likewise financially liable, Emmett fields.

LEGION TO BROADCAST MESSAGE TO VETERANS

A message has been received from James K. Fisk, department adjutant of the San Francisco department of the American Legion and addressed to all Legion posts north of the Tehachapi announcing a radio broadcast tomorrow night. The broadcast will be made over Station KILX of Oakland at 8:30. A message, said to be of vital importance to all war veterans will be given by Fred B. Mellmann, commander of Alameda County Council and member of the department's legislative committee.

This evening Commander Belgrano will speak over Station KTTM in Los Angeles. The time of this broadcast is 8 o'clock.

Lawndale — Extensive oil operations under way here.

Getting there ahead of the trouble

DURING the afternoon of March 17, 1928, an alarm bell rang in a telephone test station. This meant that a puncture had been made in the air-tight sheath of a busy inter-city cable. The men on duty knew that the injury was somewhere within 50 miles.

Highly developed locating devices were instantly applied and in sixty-five minutes the trouble spot was located. By 7:15 in the evening, before the break in the sheath had affected service on any of the 248 pairs of wires in the cable, the repairs had been made without one conversation being interrupted. This special alarm system is one of the many mechanical and electrical wonders developed by Bell System engineers to guard telephone conversations.

Automatic warning signals, electrical locating devices, constant testing of all switchboard apparatus and circuits—these are some of the ceaseless efforts that so effectively reduced interruptions to service on Bell lines in 1928. There is no standing still in the Bell System.

What TWIN IGNITION Does

THE New Nash Twin-Ignition motor has two big aircraft spark plugs for each cylinder, instead of the ordinary single plug, as you can see in the simplified diagram above.

Both plugs fire simultaneously. The gas vapor is ignited at two points instead of the usual one. One effect is quicker combustion, which produces more power, more speed, much faster acceleration.

Another result is, more uniform combustion, which helps to create the very noticeable smoothness and rhythm of Nash motor performance.

And still another result of Twin Ignition is more efficient combustion, which prevents wasted fuel.

With Twin Ignition, instead of single ignition, higher compression is practical, and the same Nash motor produces 9 1/2 more horsepower, 5 miles an hour more speed, and 2 extra miles from every gallon of gasoline you buy.

The New NASH '400'

Leads the World in Motor Car Value

IMPORTANT "400" FEATURES—NO OTHER CAR HAS THEM ALL		
Twin-ignition motor	Aluminum alloy pistons (lower third)	Longer wheelbases
12 Aircraft-type spark plugs	New double drop frame	One-piece Salton fenders
High compression	Torsional vibration damper	Electric clocks
Hondaille and Lovejoy shock absorbers (exclusive Nash mounting)	World's easiest steering (bellows crank pins)	Exterior metalware chrome plated over nickel
Salon Bodies	7-bearing crankshaft	Clear vision front pillar posts
		Nash Special Design front and rear bumpers
		Short turning radius

Fowler Nash Motor Co. 427 MAIN STREET REDWOOD CITY

Many New Features Originated by Nash

Enter service to automobile owners will be the most important national contribution made by The Nash Motors Company in the year 1929. C. W. Nash, president, predicted, this week following more than a month's personal participation in Automobile Shows throughout the country.

Since the first National exhibition opened in New York early in January, the industrial leader responsible for so many major advances in American motor car construction and quality, has traveled almost constantly to the various show centers. With C. H. Ellis, sales manager, and other company officials, he has visited most of the principal distribution centers. He has inspected Nash sales and service facilities in each point, has addressed thousands of dealers and salesmen on the Nash sales strategy, and has made a special study of Nash service departments and improvements in service organizations.

"One dissatisfied owner can do more damage to a great automobile merchandising structure than dozens of satisfied owners can mend," has been his chief automobile show theme, "and in 1929 the Nash car owner should be satisfied in every respect."

In summing up his impressions of the Automobile Show season this week, he declared that service is, after all, at the root of success in any public undertaking.

"In all my years of automobile work," he added, "I have tried to base my every activity on the simple rule that everyone is entitled to the kind of treatment I would want in any given situation. That has been the policy of The Nash Motors Co. since its inception and, I am happy to say, most men in our organization are big enough to be able to step over into the other fellow's position whenever such a question arises and see his point of view as well as their own."

"In our case, service does not lie alone in making adjustments in an owner's car cheerfully and efficiently. It lies in giving the public the last ounce of value in our power for its money; in supplying our cars with all of the advanced features that are exclusive with Nash; in placing the lowest price on our cars, compatible with good business, and in guaranteeing strict honesty and fair dealing to the public throughout our great merchandising organization in every part of the world."

"We are entering a year of high promise and are in the midst of the greatest public demand for Nash products in the history of the company. But in spite of all pressure that may be brought to bear on the part of buyers, the Nash policy of making every car as perfect as it can be made before it leaves the Nash factories will be adhered to as rigidly in the future as it has in the past. With a product that we know is one hundred percent, I look forward to our organization setting a new high standard in service for the industry in 1929."

GUILLAUME WILL PLACED ON FILE

The will of Mrs. Rose Guillaume, who died in San Mateo on February 13, 1929, was placed on file here this week by her daughter, Mrs. Susan Burnham of San Mateo, through her attorney, Franklin Swart. The estate is valued at less than \$10,000.

25 YEARS AGO

Times-Gazette, March 15, 1904
Miss Clara Hatch of Halfmoon Bay is visiting friends in Redwood City. Gabe Einstein received a very pretty line of shirtwaists this week. Miss Grace Lane left last week to open her school at Purissima.

W. Shrewsbury has taken in hand the arrangements of the play which will be given for the benefit of the Congregational church in May. The play selected is "Santiago," a four-act drama, dealing with the recent Spanish-American War.

While returning from church Sunday night John Sherman ran one side of his car onto a gravel pile of the county road and tipped out the occupants, Mrs. Wentworth and Charles Wentworth. Fortunately no one was hurt, although they all received a severe shaking up.

David A. Curry, formerly principal of the Sequoia High School of this city, has disposed of his Notre Dame property in Palo Alto for a handsome figure to a San Francisco capitalist, who is making investments in the college town.

C. OF C. ASKS COUNTY TO PAINT COURT HOUSE

A request that the coping of the courthouse be painted, and that the outside of the building be sanded was sent to be board of supervisors at their meeting Monday by the Redwood City Chamber of Commerce. The communication, which was signed by E. B. Hinman, as secretary-manager of the chamber of commerce, asked that if funds were not at the time available, that provision for this work be made when the next budget is compiled.

The communication was received by the board and ordered filed.

LIONS CLUB HEARS OF NARCOTIC EVIL

The Redwood City Lions Club had as its speaker this week Senator Benson of San Francisco, who spoke on the narcotic evil and its control. The Lions Club meets in the Emerald Lake Country Club house every Tuesday evening. The chairman of the meeting was the president, William Curran.

A large number enjoyed a church dinner served by the ladies of the Methodist church Wednesday evening. An entertaining program was enjoyed following the meal.

Bay View Lodge 109 I. O. O. F.

Meets every Wednesday Night, 7:30 at 230 Main St.

Information About Ice by Association

CHICAGO, Ill., March 12 — Are you "ice-minded?"

According to Leslie S. Smith, secretary, National Association of Ice Industries, many housewives throughout the country have become ice-minded during the first week of March, National Ice Refrigerator Month, sponsored by ice companies, refrigerator manufacturers and refrigerator dealers.

"Ice companies throughout the country are reporting to us that housewives are showing great interest in this campaign for better refrigeration," states Secretary Smith. "Many questions concerning the health-protection and labor-saving advantages of good ice boxes have been asked and answered during this campaign and many more are expected before the end of March."

"Above all, inquirers have learned from our members that ice in a good refrigerator has three outstanding advantages:

1. It is purifying. Food odors are absorbed by the melting ice film and eliminated through the outlet.

2. It protects flavor. It maintains proper atmospheric balance of cold air, dry air, moist air and pure expected before the end of March."

3. It is cheap. A survey of 20,000 ice bills shows an average year-round cost of ice per home of \$3.54 a month, with no investment but the price of the refrigerator.

"Women seem particularly interested in where to place foods in the refrigerator to get the best results from ice and how to judge a good refrigerator. Many queries on outside icing also have been received."

"Ice companies explain to their customers that a good ice box must have tight hinges and latches, must be big enough for the family, must have sug rabbits and tight gaskets, must be well insulated and must be kept well filled with ice."

"Above all, inquirers have learned from our members that ice in a good refrigerator has three outstanding advantages:

KIWANIS CLUB HEARS OF CITY OWNERSHIP

R. T. Rowe, treasurer of the Pacific Rural Press at Mountain View and city accountant of Mountain View, was the speaker Wednesday at the weekly meeting of the Redwood City Kiwanis club. Rowe spoke on the subject of municipal ownership, particularly as regards the ownership of electrical utilities.

Rowe showed that as a rule the municipally owned plant delivers power at a lower rate than the privately owned company, and he also showed figures which had been published apparently to show that municipal ownership was a failure, and which were without any basis of truth.

The chairman of the meeting was B. E. Myers, city treasurer of Redwood City. A short biography of Thomas Nelson, the most recent addition to the club, was given by Carl Stoner.

A large number of the members of the club are planning to attend a district meeting to be held at Alameda Monday evening.

There is less drying out. It is cheap. A survey of 20,000 ice bills shows an average year-round cost of ice per home of \$3.54 a month, with no investment but the price of the refrigerator.

It is purifying. Food odors are absorbed by the melting ice film and eliminated through the outlet. This goes on all the time, every hour of every day.

It protects flavor. It maintains proper atmospheric balance of cold air, dry air, moist air and pure expected before the end of March."

2. It protects flavor. It maintains proper atmospheric balance of cold air, dry air, moist air and pure expected before the end of March."

3. It is cheap. A survey of 20,000 ice bills shows an average year-round cost of ice per home of \$3.54 a month, with no investment but the price of the refrigerator."

Women seem particularly interested in where to place foods in the refrigerator to get the best results from ice and how to judge a good refrigerator. Many queries on outside icing also have been received."

Ice companies explain to their customers that a good ice box must have tight hinges and latches, must be big enough for the family, must have sug rabbits and tight gaskets, must be well insulated and must be kept well filled with ice."

Above all, inquirers have learned from our members that ice in a good refrigerator has three outstanding advantages:

1. It is purifying. Food odors are absorbed by the melting ice film and eliminated through the outlet.

2. It protects flavor. It maintains proper atmospheric balance of cold air, dry air, moist air and pure expected before the end of March."

SUMMONS
IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA, IN AND FOR THE COUNTY OF SAN MATEO.

No. 14636
HENRY M. BURNET, Plaintiff,
VS.
ALFRED BRILL, ESTATE OF EFFIE E. BURNET, deceased; DUNCAN A. McLEOD, Administrator of the Estate of Effie E. Burnet, deceased.
THOS. W. FIREY, Attorney for Plaintiff.

The People of the State of California send Greetings to ALFRED BRILL, ESTATE OF EFFIE E. BURNET, deceased, and DUNCAN A. McLEOD, Administrator of the Estate of Effie E. Burnet, deceased.

You and each of you are hereby directed to appear and answer the complaint in an action entitled as above brought against you in the Superior Court of the State of California, in and for the County of San Mateo, within ten days after the service on you of this summons, if served within this County; or within thirty days if served elsewhere.

The said action is brought to obtain a judgment and decree quieting plaintiff's title to the following described real property situated in the County of San Mateo, State of California, and more particularly described as follows:

Lot numbered forty-one (41) and forty-three (43) in Block lettered "Q," as shown on that certain map entitled "Map of Peck's Subdivision No. 1, South San Francisco, San Mateo Co., Cal.," filed in the office of the County Recorder of San Mateo County June 24, 1907 in Book 5 of Maps at page 11.

Also for general relief, as will more fully appear in the Complaint on file, to which special reference is hereby made.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will apply to the Court for the relief demanded in the complaint.

Given under my hand and the Seal of the Superior Court at the County of San Mateo, State of California, this 3rd day of August, 1928.

ELIZABETH M. KNEESE, (SEAL) Clerk
By A. M. BULLIVANT, Deputy Clerk

First publication in Times-Gazette, May 15, 1929; last publication, May 17, 1929.

LEGAL NOTICE
SUMMONS
IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA, IN AND FOR THE COUNTY OF SAN MATEO.

GERTRUDE L. MEADER, Plaintiff
VS.
JOHN FLAGG MEADER, Defendant
No. 15283

Action brought in the Superior Court of the State of California, in and for the County of San Mateo; and the complaint filed in said County of San Mateo in the office of the Clerk of said Superior Court.

LOUIS L. JAFFE, Attorney for Plaintiff.

The People of the State of California Send Greetings to:

JOHN FLAGG MEADER

You are hereby required to appear in an action brought against you by an above named plaintiff, in the Superior Court of the State of California, in and for the County of San Mateo, and answer the complaint within ten days (exclusive of the day of service) after the service on you of this Summons, if served within said County; or, if served elsewhere within thirty days.

And you are hereby notified if you fail to so appear, and answer, the plaintiff will take judgment for any money or damages demanded in the complaint filed in said County, or will apply to the Court for any other relief demanded in the complaint.

Witness my hand and the Seal of the Superior Court of the State of California, in and for the County of San Mateo, this 4th day of March, A. D. 1929.

ELIZABETH M. KNEESE, (SEAL) Clerk
By G. R. WINTER, Deputy Clerk

LOUIS L. JAFFE, Attorney for Plaintiff, 1750 Pacific Avenue, San Francisco.
